Career Objective

Aspiring Full Stack Engineer seeking an internship to build scalable, data-driven applications. Strong interest in backend systems, structured data modeling, and automation workflows. Passionate about transforming unstructured data into machine-readable formats and building efficient APIs and user interfaces. Eager to contribute to scalable knowledge platforms and modern web solutions in a fast-paced engineering environment.

Education

Bachelor of Engineering in Computer Science | Chitkara University, Punjab | CGPA: 9.30/10 | Expected 2027

12th Grade | 85% | 2022

10th Grade | 86.33% | 2020

Technical Skills

Programming Languages: Java , Python, SQL

Web Technologies: HTML5, CSS3, React, JavaScript, RESTful APIs

Backend Development: Spring Boot, Spring MVC, Spring Security, Node.js, Express.js, MVC Architecture, Microservices (Basics)

Databases: MySQL, MongoDB, PostgreSQL (Basics), Database Design & Normalization

Cloud & DevOps: AWS EC2, AWS S3, Basic Cloud Deployment

Software Engineering: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, Maven, Postman, Docker (Basics), VS Code

Development Practices: Agile Methodology, Version Control, Debugging, API Testing, Unit Testing (JUnit)

Professional Experience (Academic & Personal Projects)

- Developed backend modules for full-stack applications focusing on scalability, modularity, and performance.
- Designed and implemented RESTful APIs with secure authentication and role-based access control.
- Optimized SQL queries and ensured efficient database schema design.
- Followed Agile practices including iterative development, clean code principles, and proper documentation.
- Collaborated in team-based environments using Git for version control and integration.

Projects

Online Quiz Management System – Web Application

- Project Description:** Designed and developed a scalable role-based quiz management system with secure authentication and multi-user access.
- Technologies Used:** Java, Spring Boot, Spring Security, Hibernate, MySQL, Maven.
- Impact:** Implemented REST APIs, applied layered architecture, and ensured maintainable and reusable backend components.

Doctor-Patient Hub – Full Stack Web Application

Live Demo

- Project Description:** Built a healthcare appointment and patient management system with secure backend integration.
- Technologies Used:** Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, EJS.
- Impact:** Developed CRUD operations, validated workflows, and ensured database consistency and reliability.

Achievements & Certifications

- Ranked among Top 50 teams in HackIndia Hackathon for developing a scalable web-based solution.
- JPMorgan Chase Software Engineering Virtual Experience – Forage (Jan 2026).
- Deloitte Australia Cybersecurity Virtual Experience – Forage (Dec 2025).

Strengths

- Strong analytical and problem-solving skills with consistent academic excellence (80%+ throughout).
- Quick learner with solid foundation in backend engineering and system design concepts.
- Effective communicator with ability to collaborate in team-driven environments.
