Career Objective

Aspiring Full Stack Developer with strong foundations in Data Structures, Algorithms, and the Software Development Lifecycle (SDLC). Proficient in Java and JavaScript with hands-on experience designing, developing, testing, and deploying full-stack web applications using React, Node.js, Express.js, and Spring Boot. Seeking to contribute to a product-driven engineering team by writing clean, scalable code, owning features end-to-end, and delivering reliable, production-grade software.

Education

Bachelor of Engineering in Computer Science | Chitkara University, Punjab | CGPA: 9.31/10 | Expected June 2027

12th Grade | 85% | 2022

10th Grade | 86.33% | 2020

Technical Skills

Programming: Java, JavaScript, C++, SQL

Frontend: React, HTML5, CSS3, JavaScript

Backend: Node.js, Express.js, Spring Boot, RESTful Web Services

Databases: MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Maven, Postman, Version Control

Testing & QA: JUnit, Unit Testing, API Testing, Manual Testing

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Database Management Systems, Software Development Life Cycle

Professional Experience (Academic & Personal Projects)

- Demonstrated technical proficiency and execution while designing, developing, manual testing, and maintaining production-style applications through academic and personal projects.
- Validated backend services using Java and JavaScript, prioritizing API testing and validation for RESTful APIs to ensure reliable system functionality.
- Navigated the full SDLC and STLC using Git for version control, conducting comprehensive API and unit testing, and collaborating in an agile academic environment on feature planning and issue resolution.

Projects

Online Quiz Management System – Spring Boot Application

- **Project Description:** Designed and developed a role-based quiz management system supporting secure authentication, authorization, and RESTful APIs.
- **Technologies Used:** Java, Spring Boot, Spring MVC, Spring Security, Hibernate, MySQL, Maven, JUnit.
- **Role & Contributions:** Backend Developer; owned API development, testing, validation, and integration with frontend components while optimizing database interactions and debugging application-level issues.

Live Demo

Doctor-Patient Hub – Full Stack Web Application

- **Project Description:** Developed a full-stack healthcare application enabling appointment booking, secure interactions, and role-based access.
- **Technologies Used:** Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, EJS.
- **Role & Contributions:** Designed backend architecture, implemented RESTful services, and resolved functional bugs during testing phases to ensure system reliability.

Achievements & Certifications

- Selected among the Top 50 teams in HackIndia Hackathon for developing a scalable software solution.
- JPMorgan Chase Software Engineering Job Simulation – Forage (Jan 2026).
- Deloitte Australia Cyber Job Simulation – Forage (Dec 2025).

Strengths

- Motivated and reliable problem-solver with strong analytical and debugging skills.
- Friendly and collaborative team member with a strong sense of ownership.
- Effective communicator with proven collaboration skills in fast-paced environments.
